

$$y = kx + b$$

$$\text{т. А } (2; 6) \rightarrow \begin{cases} 6 = 2k + b \end{cases}$$

$$\text{т. В } (-4; 0) \rightarrow \begin{cases} 0 = -4k + b \end{cases}$$

$$\underline{6 = 6k \Rightarrow k = 1}$$

$$0 = -4 \cdot 1 + b$$

$$b = 4$$

уравнение

$$y = x + 4$$
